

JUDGING RUBRIC

Score each criterion from 0 to 10, then multiply by its weight. Criteria and weights follow common science fair standards. Confirm final alignment with Ohio Academy of Science rules before district and state events.

CRITERION	WEIGHT	WHAT TO LOOK FOR
Scientific Thought / Engineering Goals	30%	Problem definition, background research, and a clear hypothesis or set of objectives.
Creative Ability	30%	Originality of the idea, quality of the experimental design, and problem solving along the way.
Thoroughness	15%	Completeness of the work, attention to detail, and replication of trials.
Skill	15%	Lab technique, quality of data collection, and appropriate use of equipment.
Clarity	10%	Display board organization, verbal presentation, and ability to answer questions.

SCORE SCALE

0-2 Missing or minimal	3-4 Attempted, major gaps	5-6 Solid, meets expectations	7-8 Strong, above grade level	9-10 Exceptional, competition ready
----------------------------------	-------------------------------------	---	---	---

Judge the student's understanding, not the polish of the equipment. Ask what the student did, what the data show, and what they would do next. Interview answers count toward Clarity.

PROJECT SCORE SHEET

Judge name: _____

Project number: _____

Project title: _____

Student grade level: _____

CRITERION	WEIGHT	SCORE (0-10)	WEIGHTED
Scientific Thought / Engineering Goals	x 3.0	_____	_____
Creative Ability	x 3.0	_____	_____
Thoroughness	x 1.5	_____	_____
Skill	x 1.5	_____	_____
Clarity	x 1.0	_____	_____
TOTAL (out of 100)			_____

COMMENTS FOR THE STUDENT
