

MATERIALS SHOPPING LIST

List everything your procedure calls for before you start. Running out of a material halfway through data collection costs more time than any other mistake.

WHAT I NEED

ITEM	QUANTITY	WHERE TO GET IT	HAVE IT?	COST

Estimated total: _____

YOU DO NOT NEED LAB EQUIPMENT

Everyday materials produce valid data for most middle school projects: rubber bands, cardboard, measuring cups, pharmacy thermometers, kitchen scales. A project is not less scientific for using them.

BEFORE YOU BUY ANYTHING

- ☐ Ask your teacher what the school already has. Most classrooms have rulers, timers, and measuring tools.
- ☐ Ask whether FairGame or your school can supply what you need. Nothing about this project should require a purchase.
- ☐ Check that a cheaper substitute would not work just as well.
- ☐ Confirm your design is approved before spending anything.
