

PHOTO DOCUMENTATION LOG

Photograph your work as you go. You cannot recreate a photo of week three during week twelve.

PHOTO #	DATE	WHAT IT SHOWS	WHERE IT GOES ON MY BOARD

PHOTOS WORTH TAKING

- Your setup before you start, showing every material in place
- You running the experiment, hands visible in the work
- Each condition side by side, so a viewer can see the difference
- Anything unexpected, including the trials that failed
- Your final measurement being taken
- Your finished display board, for your own records

JUDGES LOOK FOR YOU IN THE PHOTOS

Photos showing you doing the work are evidence the project is yours. Ask someone to take a few of you mid-experiment, not posed afterward.

BEFORE YOU PRINT

- ☐ Check the photo is sharp at full size, not blurry when enlarged.
- ☐ Crop out clutter that distracts from the subject.
- ☐ Get permission before including anyone else's face.
