

PROJECT BUDGET PLANNER

Track what your project costs. Most middle school projects should cost very little, and many cost nothing at all.

PLANNED SPENDING

ITEM	ESTIMATED COST	ACTUAL COST	WHO PAID

IF COST IS A BARRIER

- Tell your teacher before you change your project. Schools and FairGame can often cover materials.
- Redesign with what you already have. A friction test using household surfaces costs nothing.
- Share materials with a classmate testing a related question.
- Ask whether the school supply closet has what you need.

COST IS NEVER A REASON TO DROP OUT

FairGame exists because students in under-resourced schools deserve the same shot. If money is the obstacle, say so early and it gets solved.
