

SAFETY CHECK AND RISK ASSESSMENT

Complete this with your teacher before data collection begins. Your state affiliate fair has clear safety rules, and ProjectBoard enforces them during registration.

Student name: _____

Project title: _____

DOES YOUR PROJECT INVOLVE ANY OF THESE?

Check every box that applies. Anything checked needs teacher approval, and some need approval forms filed before you begin.

- ☐ Human subjects, including surveys, taste tests, or anything measuring people
- ☐ Vertebrate animals of any kind
- ☐ Chemicals beyond ordinary household products
- ☐ Bacteria, mold, or other microorganisms
- ☐ Heat sources, open flame, or anything that could burn
- ☐ Sharp tools, glass, or projectiles
- ☐ Electricity beyond standard batteries
- ☐ Controlled or regulated substances

IF YOU CHECKED ANY BOX

Talk to your teacher this week, not later. Projects involving human subjects or vertebrate animals need approval forms filed before data collection starts. Building approval into your timeline is far easier than restarting in week nine.

SAFETY PLAN

Risks I identified: _____

How I will reduce each risk: _____

Safety equipment I will use: _____

Adult supervising this work: _____
