

TOPIC BRAINSTORMING

Great projects start with something you already care about. Work top to bottom: interests first, then questions, then a feasibility check.

STEP 1: DISCOVER A FIELD

List things that interest you: hobbies, problems you run into every day, questions you have about life.

STEP 2: FIND A PROBLEM

Pick your two favorite interests. For each one, write a question you genuinely want answered.

STEP 3: FEASIBILITY CHECK

- ☐ Can I test this question with an experiment I run myself?
- ☐ Can I get the materials I need?
- ☐ Can I finish within my project timeline?
- ☐ Is it safe, with no flames, dangerous chemicals, or live animal risks?
- ☐ Would I still find this interesting two months from now?

MY WORKING TOPIC

NEXT STEP

Turn your working topic into an if, then, because statement with the Hypothesis Worksheet.
